

Floods

Britain has been having more floods than ever before. This is because there has been so much rain. In January 2014, there was more rain than there had ever been in one month before. Rivers were not able to take it all in. The waters rose and rivers burst their banks, flooding the land around.

15. What does *burst their banks* mean?

Tick **one**.

- Water levels went down.
- Water levels stayed the same.
- Water went over the top.
- Water stopped moving.
